

John Nieters

By: Morgan Sims and
Jake Armuth

John Neiters, a 2001 ABC graduate, attended Educare, and the only thing he can recall about is his teacher, Mrs. Steigerwalt. While at ABC-Stewart School, his preferred subject was math, because he was naturally good at it. The most challenging subject for him was English/reading.

His best memories are from recess. He remembers playing CTF (Capture the Flag), basketball, and pin dodge ball.

While in his last year at Stewart he really was on an independent self-motivated math program. While at Stewart, John participated in Math Bowl, Spell Bowl and the Basketball teams. During John's last year, the Math Bowl team came in first in the state.

John remembers Pioneer Day, the D.C. trip, Space Camp, the Zoo, the Third House and Paging, and Bradford Woods. His favorite non-field trip was acting in and setting up the haunted house, even

though he stepped on a nail.

He does not even remember doing a graduation speech, so he doesn't have any pointers for the hopeful graduates of the 2006-07 school year.

John felt a little scared entering middle school, but everything was all right in the end.

Some of the extra curricular activities John participated in in secondary school were the Diversity Council, DECA (Developing Economical Competencies for all students), and men's tennis.

In DECA, John won state and went to Nationals two years in a row. He is going back this year to Orlando to participate in Diversity Council, which allows him to meet many different people.

John, an avid tennis player, was team captain of the Columbus North men's tennis team for two years, the #1 single player, and was named the double MVP. He went to All State level 2 winning an All State Tennis award, and being named, All-State Player.

John has traveled to Cancun, and he likes the Culture there, in the sense that it was Americanized.

During the summers of high school, John teaches tennis and plays competitively to prepare for college tennis. John will be on the men's tennis team while in college, but he does not have any scholarships, even though he is a great tennis player.

If John could play a professional sport, it would be tennis. His second and third choices would be basketball or soccer.

John's advice to students is to live every day to its fullest, because you never know what will happen.
